

A woman with long, dark hair is shown in profile, her eyes closed and a serene expression on her face. She is positioned on the left side of the frame. The background is a close-up of a stone surface with distinct, wavy, concentric layers of light beige and cream colors, creating a textured, organic pattern. In the top right corner, there is a white rectangular box containing the company logo.

SCHUBERT STONE – THE STONE CENTRE

Experience the art of living firsthand

Every stone tells a story of millions of years of geology and offers thousands, if not millions, of possibilities. You will find these at the SCHUBERT STONE CENTRE represented in the form of over 2,000 types of stone floors and large random slabs. Our 3,000 m² exhibition area showcases a wide variety of colours, surfaces and styles.

We bring these impressive witnesses of natural history, comfort and tranquillity into your living areas and gardens. And day after day you will experience the magic of natural stone ...

Together with you, we will design your dream of living.
Visit us at SCHUBERT STONE – THE STONE CENTRE.

Yours sincerely,

Thomas Schubert, Master Stonemason

P.S.: Let yourself be inspired by the numerous ideas on the application of stone, presented on our CD-ROM, which you will find enclosed at the back of the folder.

SCHUBERT
STONE CENTRE

You are in expert hands

Making the right choice

Our customer centre presents the most popular types of natural stone and Technostone in harmony with premium parquet flooring on a large area. Our stone experts will discuss and analyse your ideas with you and show you possibilities of combining the various types of stone and wood, thus ensuring that you definitely make the right choice.

Travel through time in style
The revitalised Villa Schubert is the centrepiece of our gallery. Experience, feel and understand the effect of limestone and slate floors, generously presented on large areas, combined with exclusive wood parquets and stone spiral stairways.

The Technostone Studio

Our well-arranged Technostone Studio showcases various examples of flooring designs and demonstrates how your living area can be designed according to your individual needs and ideas. We are continuously expanding our Technostone collection by adding new and interesting colours and surfaces.

Our state-of-the-art glass mosaic collection presents the latest trends and nearly unlimited possibilities.

Beauty in the daylight

Natural stone used outdoors is exposed to the elements of nature 365 days a year and can be visited at SCHUBERT STONE CENTRE 24/7. Experience the variety of stone types and laying options in natural light. You will see natural stones for gardens and terraces in the daylight, just as nature has shaped their beauty over the years.

From handcraft to art

We invite you to visit Austria's largest gallery of large random slabs, exhibiting hundreds of exclusive, massive and up to 500 million year-old stone slabs. You will marvel at the unique and rare colours, structures and surfaces of semi-precious stones, onyx, Lapis Lazuli, granite, marble, limestone, quartzite, sandstone, and slate. You will be enthused by the beauty and purity of nature.

Finishing touches made in-house
Our in-house stonemason workshop offers many advantages to our clients. Together with our stone experts, you can select the part of a stone slab you wish to have cut by our stonemasons. In our master workshop, your stone will be turned into a work of art. Our stone artists transform the raw slab into your masterpiece made of stone.

Our stones are purchased throughout the world

SCHUBERT
STONE
THE STONE CENTRE

Facts and figures

We are proud to host Austria's most varied stone gallery with an average inventory worth over 2.5 m Euros. This corresponds to around 30,000 m² of stone slabs with a total weight of over 1,400 tonnes.

On duty throughout the world

Our stone experts are in search of the latest trends and interesting and exclusive materials throughout the world. Our stones mainly come from Austria, Brazil, Bulgaria, China, France, Germany, Iran, Israel, Italy, Portugal, Spain, Turkey, and the UK.

Quality check

For some types of stone, it is important to already check and carefully select them at the quarry. All other stone types are inspected, at the latest, upon storage or after refinement.

A world of stone – waiting for you

We are continuously looking out for new, trend-setting stones and Technostones to cater for your individual project needs. Visit our showrooms and discover the myriad options for combining various materials. You will learn important details about your desired materials, such as the recommended area of use, their pros and cons, as well as possibilities of floor laying and floor structure.

In order to ensure that our stone experts are available for competent advice, you are kindly asked to pre-arrange an appointment.

We realise your dreams

Individuality – carved in stone

Experience your future interior design in 3D. Clearly structured visualisation facilitates making the right choice of flooring. You will thus be reassured, at an early stage, that you have made the right decisions. Upon request, our HOMElinks.at partners will be happy to realise, together with you, also other aspects of your home in 3D, such as furniture, walls or the garden. Find out more at www.homelinks.at.

From the idea to realisation

After a visit to the showrooms and having selected the material according to your ideas, our experts will work on a customised proposal, including – if requested – a 3D visualisation. The subsequent proposal leaves no question unanswered. Upon placement of the order, the proposal will

be supplemented with all the details. We refine your selected stones in our in-house stonemason workshop and ensure timely delivery according to your schedule.

Wood and stone at their finest

Stone is ideally combined with parquet flooring. Convince yourself in our

large showrooms. With us, you will find the matching parquet for your selected stone floor – or the other way round.

Stone and parquet laying

Our professional floor layers ensure high-precision work for your project.

3D photorealistic visualisation according to our client's construction plan

Natural stone for interior use

Stone – timeless natural beauty

Limestone floors have been used in private homes and public buildings for centuries. They represent the cultural heritage of our famous sites.

They maintain their charm and create a pleasant, cosy atmosphere, even if subject to heavy strain. In addition, limestone floors require low maintenance, ensure a neutral background for your furniture and go particularly well with parquet flooring. In ancient Rome, floor heating was already installed for stone floors, since stone conducts and stores heat very well.

Slate creates avant-garde living

Pure nature – the cleft surface of slate is well suited for extravagant, modern architecture.

Our inexpensive slate floors in intense grey and green tones invite you to walk barefoot.

Limestone – the classic

Limestone floors impart a calm and timeless ambience to your rooms and are thus considered among the classics of stone floors.

Experience the floors exhibited at the Villa Schubert in a living room atmosphere.

Sandstone for modern living

Honed sandstone in intense brown mineral tones creates a warm atmosphere and adds a personal note to your home. Due to its high quartz content, sandstone is particularly robust.

Natural stone for exterior use

**SCHUBERT
STONE**
THE STONE CENTRE

Limestone – Cosiness for your pool area

Close your eyes and feel the stone with its even surface and the edges resembling river pebbles. You will feel the retained heat and enjoy the history of earth at that very moment.

Sandstone – the Mediterranean at home

Redstone Modak, Sandstone Mint or Greystone will add a Mediterranean flair to your garden with a little exoticism. Its aesthetic colours form a lovely contrast to the green of your plants.

Limestone – the reliable choice

Classic limestone with its light beige shading is highly robust. It is well suited for integration into both modern and classic ambiences and ensures a decorative and cosy atmosphere.

Natural stone – naturally, also for exterior use

Natural stones are ideally suited for outdoor use and ensure cosiness, no matter the weather. We make sure the stones are easy to maintain in order for you to enjoy your valuable spare time outdoors as much as possible and to delight in your stones for many years. It goes without saying that all our stones for exterior use are frost resistant and durable. Convince yourself and visit our open air terrace gallery.

Technostone, tiles, porcelain, and glass mosaics

A stone or not a stone?

Technostone is an industrially produced stone that is almost as hard and as beautiful as diamond. It is produced from natural quartz and a little kaolin, sintered at 1200°C at high pressure and processed into a homogeneous slab. A novel material that is extremely robust, absolutely hygienic and impervious. Technostone has set a milestone in the art of modern living. It is available for nearly any type of application – in numerous colours and surfaces, for both interior and exterior use, catering to our clients' individual needs.

Technostone – an interpretation of natural stone

Its inviting visual appearance creates a pleasant living atmosphere. Moreover, Technostone is impervious and stain-resistant. Slabs of up to 100x100 and 120x60cm in size create a spacious ambience.

Perfection into every detail

Schubert Technostone was taken from nature and brought to perfection. It is ideally suited for both interior and exterior use. The signs of the times do not affect Schubert Technostone, it maintains its form and colour forever.

Glass mosaics – individual works of art

Our high-quality glass mosaics are not only beautiful; they can also be adapted to your individual requirements. Create your own work of art; there are no limits as to the motifs – for sure an eye catcher in your new home.

Large random slab gallery for luxury baths and kitchen counters

**SCHUBERT
STONE**
THE STONE CENTRE

A gigantic piece of perfection

These majestic bathtubs are made out of a single massive stone block. The surfaces are polished to perfection – for a unique bathing experience. We also offer massive shower trays and vanity tops made of stone to fulfil your dreams of a perfect bathroom.

High-quality products from great depths

Experience the feeling of a vacation in your home every day. Step into a jacuzzi decorated with glass mosaics, walk barefoot over pebble stone floors – we fulfil your fanciful desires in terms of stone.

Working on stone

Make your selection from our large random slab gallery that offers a huge variety of multi- or single-colour and extremely hard granite, quartzite, industrial quartz stone, and hard limestone, with seemingly lustrous or velvety, mat surfaces.

Large random slabs – your everyday luxury

Translucent onyx and semi-precious stone slabs for your wellness area and bathroom – use stone slabs as works of art on your walls. Let your imagination run free! Take advantage of our gallery, every stone slab is unique. Select your favourite slab at the SCHUBERT STONE CENTRE and determine, together with our technicians, the part of the slab you wish to have cut and refined.

Schloss Hof, Lower Austria

“Since its renovation, Schloss Hof palace has been among the most visited sights in Lower Austria, which all parties involved, in particular the Marchfeldschlösser Revitalisierungs- und Betriebsges.m.b.H, are deservedly proud of. The limestone from Schubert Stone, selected in accordance with the Federal Monuments Office (Bundesdenkmalamt) contributed significantly to the authentic appearance of the palace. We thank Schubert Stone for the great cooperation.”

Univ. Prof. Manfred Wehdorn, architect, Vienna

Modern villa, Vienna/Austria

“Our task was to build a representative villa on a very steep hill with the aim to create interaction between classic and modern elements that should combine into a mutual, timeless overall appearance. To this end, the discerning owners selected, together with me and the stone expert Thomas Schubert, exclusive limestone, Technostone, mosaics, and onyx during several appointments at the Schubert Stone Centre.”

DI Paul Richter, architect, Vienna

Steirereck Restaurant, Vienna/Austria

“The Steirereck has been among Austria’s leading gourmet restaurants for decades. When we renovated the villa on the Wienfluss, a listed building, it was only logical to visit the stone gallery at Schubert Stone. We do not only pay great attention to quality when selecting our food and services, but also with regard to the construction materials used for our restaurant. We consistently ‘live’ our company mission of putting the highest demands on quality in all areas, which has brought us great success.”

Heinz Reitbauer, Steirereck, Vienna

© Kaiserliche Festschlösser

Modern private home, Ireland

“For this high-end detached house, over 1,000m² of interior stone floors and 400m² of exterior terraces were laid to the full satisfaction of our client. The biggest challenge of this project was that this marvellous house had to be built and fully furnished within just three and a half months. According to the client, this was perfectly accomplished, due to the excellent cooperation with the Austrian HOMElinks.at partner companies under our overall coordination.”

DI Schierl/DI Paris, architects, Vienna
